

Subject: Primary Agricultural Science

LEVEL: Standard One

Topic: Types of farms

At the end of the lesson you should be able to:

- Learn about a farm.
- Learn about the different types of farms (crops, animal, mixed).

CONTENT

What is a Farm?

A farm is a place where plants are grown or animals are kept for food.

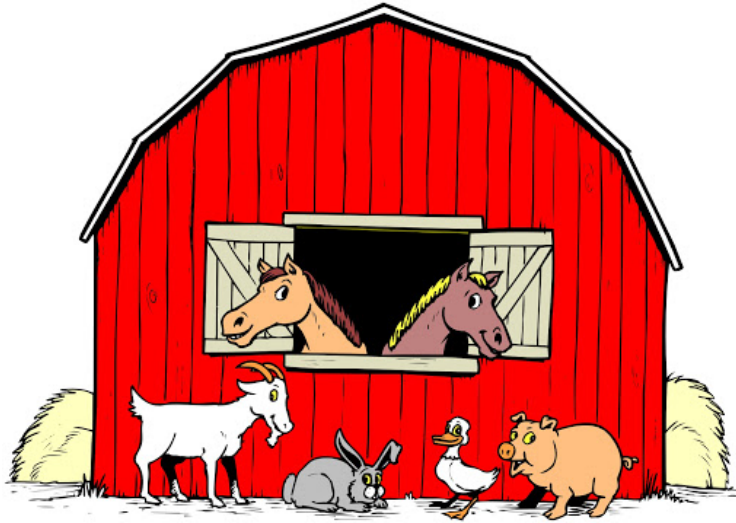

What are the different types of farms?

1. A Crop farm:

On this farm only plants are grown. Some plants that are grown on a crop farm are: oranges, corn, peppers and lettuce.

2. An Animal farm:

<http://clipart-library.com/clipart/zTXo5yMac.htm>

On this farm only animals are kept. Some animals that are kept on an animal farm are: cows, sheep, chickens and goats.

3. Mixed farm:

<https://twitter.com/agrodomaintd/status/1216647654643503104/photo/1>

On a mixed farm farmers grow crops and take care of animals. For example, they may grow some crops such as lettuce and peas and take care of some goats and chickens

STUDENT SELF ASSESSMENT

Subject: Agricultural Science

Topic: Types of farms

- 1. On a crop farm, only crops are grown. Circle the crops that are grown on a crop farm:**

Lettuce

chicken

Carrots

Pigs

Sweet Peppers

Cucumbers

- 2. On an animal farm, only animals are reared. Circle the animals that are taken care of on an animal farm:**

Pigs

Sheep

Tomatoes

Rabbits

Cabbage

Ducks

- 3. On a mixed farm, both _____ are grown and _____ are reared.**
