**Subject:** Mathematics

**Level:** Standard One

**Strand:** Number

**Topic:** Odd and Even Numbers to 100

---

**By the end of this worksheet, you will be able to:**

- Differentiate between odd and even numbers.

**Key Points:**

- An **even number** of objects can be divided into **groups of two** without leaving a remainder.

*Example:* Eight marbles can be divided into four groups of two groups without a remainder, as seen below:

Therefore, **eight is an even number.**

- An **odd number** of objects **cannot be divided into groups of two** without leaving a remainder. In other words, **one is always left out of the group.**

*Example:* Five marbles cannot be divided into groups of two without leaving one out, as seen below:

Therefore, **five is an odd number.**

- Even numbers end with the digits **0, 2, 4, 6, or 8.**

*Example:* 20, 32, 44, 56, and 68 are all even numbers.

- Odd numbers end with the digits **1, 3, 5, 7, or 9.**

*Example:* 21, 33, 45, 57 and 69 are all odd numbers.
